

**FOXHILL MEDICAL CENTRE**  
**STATEMENT OF PURPOSE**  
**MARCH 2015**

Our aim is to provide appropriate and accessible primary medical services to the whole of our registered population. This embraces treatment of disease, disorder or injury, maternity, midwifery and family planning services, diagnostic/screening procedures plus surgical procedures as required

We aim to provide an equitable service to all patient groups and do not discriminate on any grounds.

We provide pre-bookable and same day access for GP consultations and we also provide home visits where necessary. There is also access to appointments with practice nurses and a health care assistant.

We offer psychological therapy via a psychotherapist and IAPT workers.

Occupational health advice is available (by appointment) with a specialised worker.

Our Patient Participation Group is well attended and provides an interface between the management of the practice and the patient population.

Our objective is to improve the health and wellbeing of the practice population and community.
