

Temporary suspension of new patient registration

From 1st August 2016

We are sorry that we are currently unable to accept your application to register at the Billericay Medical Practice.

We are committed to providing a safe, accessible and quality medical service to our patients.

As a consequence of current workload pressures, a net increase of more than 17% of new patients registered at the practice in the past six years and GP vacancies not being filled due to a national and local shortage of GPs, we have temporary suspended new patient registrations, in order that we can maintain a quality and safe service to our existing patients.

We will update our website www.gps-billericayhealthcentre.co.uk when we find ourselves in a position to register new patients.
