

Thank you to those of you who completed the Family and Friends Survey for us in August. We are again pleased with the feedback we have had. However, again the number of responses we received were minimal. As you can see from the above graph, two patients were 'extremely likely' to recommend us to their family and friends, the 3<sup>rd</sup> patient didn't feel strongly either way.

Remember you can complete the survey as often as you like as your comments are a reflection on 'today's' experience.

We asked patients to tell us why they gave us the rating that they did and here are the answers that were given.... Please remember that we can only publish your comment if you give us permission to do so by ticking the box. This month only one of the two patients gave us permission to do this.

Patients who were 'extremely likely' to recommend us said...

"I have always been treated with a high level of courtesy and made to feel that my concerns are taken seriously and given both good advice and treatment."

"I get excellent medical care at Arlington Road. I have already recommended the practice to family members moving to Eastbourne, and they have now joined the practice."

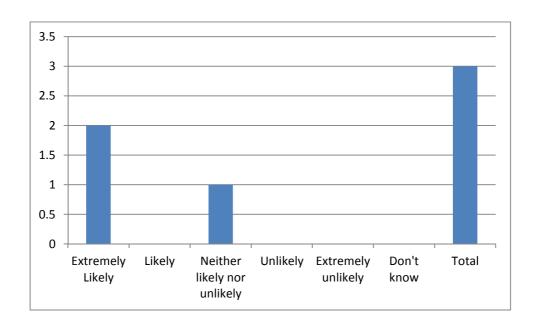

If we could change one thing about your care or treatment to improve your experience, what would it be?

We received two responses with permission to publish to this question...

"I am unable to find any faults"

"Making booking appointments easier - booking online is a step forward"

It's good to hear a positive response about the online booking system. We have also found that making the majority of our appointments pre-bookable rather than expecting the patients to phone on the day has been mostly well received.

Thank you to those of you who completed the Family and Friends Survey for us in August. We are again pleased with the feedback we have had. However, again the number of responses we received were minimal. As you can see from the above graph, two patients were 'extremely likely' to recommend us to their family and friends, the 3<sup>rd</sup> patient didn't feel strongly either way.
