Online Consultations...

**Engage
Consult**

Engage Consult is an online platform that allows you to contact the Practice via a link on our website.

You can use this service to request medical advice. Your request will be triaged and you will receive a message back from the Practice with details of your Face to Face or Telephone appointment, as appropriate. Consultations using this service are now carried out in-house and no longer referred on to South Downs Health and Care.

Please ensure you complete all questions presented to you prior to submitting the consultation, to avoid having to resubmit information to us. We require this level of detail to be able to help you safely.

The opening times of this service will be presented to you prior to starting an online request, with confirmation emailed to you once your request has been submitted. The opening times have recently changed and the service now only operates between 6.00 and 8.00am.

You can also contact our admin team with administrative queries between these hours.
