

Charged Services

Probus Surgical Centre are proud to be able to offer a range of training activities to support other centres around the country that wish to develop primary care surgical centres.

We have developed the following charged services guide to allow prospective or currently practising primary care surgeons to either acquire new or build upon their existing skills.

Carpal tunnel assessment and decompression surgery	£1000 per day
Hernia assessment and repair surgery	£1500 per day
Vasectomy surgery	£1000 per day

People wishing to access this training can do so for as many days as required, dependant on availability. Individuals can contact Chris Gendall, Senior Surgical Manager, to discuss their own personal requirements.

The format of the training days will depend upon procedure, but prospective candidates will work with one of our established surgeons on a standard patient list.

It should be noted that we are not able to give a Statement of Competence and any future surgical activity will be the responsibility of the surgeon.

Prior to visiting us, we will require:

- Full payment for the allocated number of days
- GMC Number
- MDU / MPS Membership Number (or equivalent)
- Location of own PCT
- A signed Confidentiality Statement
- Photographic proof of identity (passport, driving licence)
- Proof of address
