

Medication Reviews

Sometimes you may see an entry on your online medical records to say that you have had a medication review in your absence.

This is done in your best interests and if you have not advised of any issues with the medication and the clinician reviewing the medication is happy that all seems well, this will be documented on your records in your absence and is nothing to worry about.

If there is ever any issue with your medication/s, we would ask that you book an appropriate appointment with our either the Clinical Pharmacist or a Doctor.

Thank you.
