

## **The Garden of Learning at Horton Park**

Come and join Horton Park's exciting 'Garden of Learning'

All you need to bring is your seeds of participation, motivation and yearning

In this vibrant garden all are learners only some young and some old

Every one just as important, worth their weight in gold

Together we must water this garden with experience and reflection

So we can cultivate the flowers of knowledge and perception

The fruits are of skills that are harvested in this fashion

Not to mention the deep fragrance of values like care and compassion

Let us protect this with a fence of hard work and commitment

(One able to bear the heavy storm of any challenge and assessment

Provided for you are the tools of guidance, tutorials and apprenticeship

These are found in the secure shed of support and friendship

During your time here there will be many an achievement

Both individual and collective, a great taste of fulfillment

Lets work together to construct, collaborate and shape

Our own diverse and innovative GP landscape

So that we can open our gates for this garden to be shown

For our patients to enjoy the blossom of what we have grown

Abid Iqbal (2015)
