

Important Information for Patients

GPs across Mansfield & Ashfield and Newark & Sherwood are reminding people that their surgeries will be closed over the Easter and May Bank Holidays.

The tables on the right show which pharmacies are open over the Bank Holiday period, together with their opening times.

Remember that the majority of pharmacies are open for limited hours, so please make sure you drop off and pick up any repeat prescriptions and don't run out of vital medicines over the Bank Holiday period. Requests take 48 hours to process. It's recommended that people collect their prescriptions well before the weekend so any issues with them can be dealt with in time.

Choose Well

Self Care

Self-care is the best choice for very minor illnesses, ailments and injuries which can all be treated from a well stocked medicine cabinet. NHS Choices www.nhs.uk is a dedicated website with expert advice on a range of illnesses.

Pharmacy

Go to any of the pharmacies listed for advice about common illnesses and over the counter remedies.

GP Out of Hours

If you need urgent medical care that cannot wait until your GP surgery opens, you can access the Out Of Hours Service by calling your usual GP surgery number.

Primary Care 24 (PC24) & Urgent Care Centre

PC24 is available at any time for patients with urgent health needs who do not require emergency hospital care. They will assess and treat conditions for which you would normally visit your GP.

PC24 is adjacent to Kings Mill Hospital and the Urgent Care Centre is at Newark Hospital. No appointment is necessary and waiting times vary.

111

Ring 111 if you think you need healthcare urgently, but it is not an emergency, or you are not sure what to do.

You can call 111 for advice 24 hours a day, 365 days a year, and it's free. But don't forget **A&E is only for life threatening emergencies**

999 and A&E

Only dial 999 or visit A&E if you require emergency treatment for a potentially life-threatening condition such as:

Loss of consciousness Severe chest pain Severe breathing difficulty Heavy bleeding Fitting/convulsions Severe allergic reactions Any symptoms of a stroke
