

Shaftesbury Medical Centre
Patient Participation Group

We would like to set up a Patient Participation Group that will enable patients to share their views on the range and quality of services provided.

You can get involved in a variety of ways to suit YOU!
This includes attending our meetings, email, post, telephone or through our website.

The group will help us to develop as a practice and agree on common priorities for both patients and the practice.

Please complete your contact details and return to Reception. We will then be in touch with more details and obtain your views.
