11 March 2015

Dear Mr How

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link:

<http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=181861>

Please contact the office on 0845 5197493 or reports@cfepsurveys.co.uk if you require further information about your report.

Yours sincerely

CFEP UK Reports Team

Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Availability to speak to doctor via phone. Reception queue when you have an appointment, a system needs to be in place. Two receptionists booking in clients, two receptionists on the phone for example.
- Better appointment times.
- No, I find practice very good for me.
- Receiving texts to confirm appointments was very helpful, but it seems to have stopped, please could you bring it back again?
- Really bad nurse.
- All perfect.
- I have used the practice for over 10 years and wouldn't change.
- Well done.
- Waiting time to see doctor - time between appointment should be longer.
- If reception staff are busy on phone they should still show some form of acknowledgement to patients waiting so they feel just as important.
- Waiting times need to be improved.
- Been in this practice since birth, the only thing I'd like to be improved is the reception picking up the phones earlier.
- They're very good.
- Privacy at reception when discussing appointment/illness.
- No comments.
- No comment.
- Not bad at all.
- I am pleased with this practice. I have no problems.
- Very good, I love the practice.
- New doctors need to be trained on how to receive and treat patients. They need to speak to them in a respectful manner. They need to convince patients that they are capable in their profession and follow ethics.
- Right now the practice is excellent for my family.
- To give items/creams over prescription when asked for, not always needing to buy over the counter (not this visit, in the past).
- Maybe by having a bigger health centre with more staff.
- Very happy with the doctors. Receptionist very good.
- They are all very good, excellent in treatment.
- Being a patient with this practice for many years and so far with my opinion, its service could improve by a few more doctors in this practice because it is short of doctor.
- No need, very good.
- The practice offers an excellent and unique medical service to high quality standards. Potential additional funding would have potential for growth.
- Since joining the clinic recently, I regret not registering here before. The care and attention is incredible. I do not have any of what I am now receiving previously.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Healy Medical is a very good and professional but personal GP practice that really cares for their patients. We've been coming here since the 1990s and children who are adults continue to attend this practice when they could have chosen to go elsewhere. It says a lot about the service we receive.
- The waiting rooms are a bit old.
- It could be open all day Thursday and possibly Saturday mornings.
- If I order tablets giving more than 3 days notice, sometimes the order form gets mislaid.
- Overall it was very good.
- Earlier and later opening and closing hours.
- None at moment.
- Telephone very, very busy when trying to make appointment.
- The doctors, nurses and staff are all equal to the job.
- The service provided by the practice has been excellent. It has been very flexible in the approach to my needs.
- Give practice more money to increase more staff so that they can serve more patients.
- Make it not feel like you are on a conveyor belt of just another person with symptoms.
- Very good.
- No comment, to me everything is great.
- They are well organised, and wonderful in the way they deal with patients.
- We have all been at this surgery for over 35 years. The best doctors and staff ever possible. Greatly appreciated.
- Just continue to do the good work to the patients.
- None whatsoever as I am quite happy the way the service has been run up until now.
- Managing patient requests made to the pharmacy in a timely manner. Having an individual within the practice who is responsible for hospital correspondence.
- Always good service and well taken care of.
- Not necessary.
- Provide adequate funding to permit GPs to work properly.
- No need to alter the service.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- Excellent service.
- One doctor seems okay and I was pleased with his service.
- Overall the doctor/nurse very good to handle patient.
- I find doctor and nurse very good and helpful.
- None, all are excellent.
- A new nurse.
- I think they have done a good job.
- All perfect.
- Great people. Helpful, understanding, excellent doctors.
- Well done.
- Love my doctor, he's amazing.
- I can access my doctor whenever I want. Nothing to be improved.
- Good good.
- Well done to all.
- Overall excellent.
- Am very fine with them thanks.
- Listen to the patients at all times. Treat them with respect and kindness. Try to offer appointment in shorter periods if possible. Try not treat every illness with conventional medicines but alternate ways ones, as herbal or self managing i.e. advise on healthy living.
- Doctor is an excellent doctor for my family.
- Was very good.
- I would like to say that the doctors and nurses can improve by having more trained staff, as usual. I find all the doctors/nurses quite polite/respectable and helpful.
- Continue training to keep up with current issues. Very respectful.
- Happy with the service so far.
- All doctors very good and excellent, but the nurse could improve.
- No need, all very good.
- The doctor has saved my life and today I was supported with the nurse who was very supportive in my health development. All staff are excellent.
- Can't be anything else, I'm sure. I've been treated fabulously.
- All I have for my doctors at Healy Medical is high praise. They actually care about their patients.
- I saw the HCA.
- The nurse is very good.
- None at moment.
- Very excellent, thank you.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- No need for.
- Be a bit more human.
- We are getting a good service. The doctors are okay.
- Excellent.
- No comment, it's just well done job from the doctor, well done!
- Thank you my doctors and surgery staff.
- Excellent.
- No comments, as I am more than happy from the treatment I have been receiving from my GP.
- None whatsoever.
- Not necessary.

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 156

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	0	2	35	54	63	2

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{\text{(number of Poor ratings x 0) + (number of Fair ratings x 25) + (number of Good ratings x 50) + (number of Very Good ratings x 75) + (number of Excellent ratings x 100)}}{\text{(Total number of patient responses - number of blank/spoilt)}} = \frac{(0 \times 0) + (2 \times 25) + (35 \times 50) + (54 \times 75) + (63 \times 100)}{(156 - 2)} = 12,150/154$$

Your mean percentage score for Q1 = 79%

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

- Lower quartile, below which lies the lowest 25% of the data
- The median, cuts the data set in half
- Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	79

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Table 5 lists your current scores for each question together with scores from your last 3 surveys (if applicable) for comparison.

Page 6

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
	Survey ID
	Practitioner ID

You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- All the information provided by patients is put together in a report for the practice. Your answers will not be identifiable. Any comments you make will be included but all attempts will be made to remove information that could identify you.
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this with a blue or black ball-point pen. If you change your mind just cross out your old response and make your new choice.

When giving your feedback, please only consider the consultation you have had today.

About the practice

	Poor	Fair	Good	Very good	Excellent
1 Your level of satisfaction with the practice's opening hours	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2 Ease of contacting the practice on the telephone	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3 Satisfaction with the day and time arranged for your appointment	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4 Chances of seeing a doctor/nurse within 48 hours	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
