

Abernethy House Surgery

Confidentiality of Patient Data

Introduction

This document sets out the arrangements in the practice for the confidentiality of patient data. The Practice complies with the Data Protection Act and GDPR regulations 2018

The Practice's Responsibilities

The practice will ensure that employees fully understand all their responsibilities with regard to confidential data, by ensuring employees undertake Information Governance training and sign a written statement of the responsibilities they are undertaking towards the security of all data within the surgery. Competency will be assessed as an ongoing process and as part of the appraisal process.

The practice will complete and submit the DSP Toolkit self-assessment on an annual basis.

The practice will also ensure that arrangements are in place for the confidential disposal of any paper waste generated at work. Care should be taken to ensure that the company are accredited to destroy sensitive papers. Records should be kept of the registration of the company and a log of collections.

The practice strictly applies the rules of confidentiality and will not release patient information to a third party (other than those involved in the direct care of a patient) without proper valid and informed consent, unless this is within the statutory exempted categories such as in the public interest, or if required by law, in which case the release of the information and the reasons for it will be individually and specifically documented and authorised by the responsible clinician.

The practice follows the Health and Social Care Information Centre document "A Guide to Confidentiality in Health and Social Care, Sept 2013".

Leaflet Wording (Patient Information Leaflet or Poster)

All patient information is considered to be confidential and we comply fully with the Data Protection Act and Caldicott principles. All employees in the practice have access to this information in relation to their role, have confidentiality clauses in their contracts of employment and have signed a confidentiality agreement. All staff members adhere to the Confidentiality: NHS Code of Practice 2003.

To ensure safe and effective care, patients' information may be shared with other parties within the care team who are involved in their direct care. Where a patient wishes information not to be

shared within the team providing direct care, then they must discuss this with their GP and a note in the record made.

Patient information will not be shared outside of the direct care team without consent being sought. An individual has the right to refuse to have their information disclosed, although this may have an impact on their care, and their wishes will be complied with.

It is imperative that when it is right to release details to 3rd parties that the information only includes what has been asked for and not necessarily the full record.

There is currently one national data extraction from which patients may wish to “opt out” – the Summary Care Record:

The SCR enables healthcare staff providing care for patients in an emergency and from anywhere in England to be made aware of any current medications or allergies the patient may suffer from. This information from every patient record is sent electronically up to the Spine in order for this to happen. If patients wish their information to be withheld from the SCR, they can “opt out”. Please ask at reception for the SCR Opt-out Form or download from:

Use of Online Consultation/Video-conferencing software (inc. MS Teams)

Video sharing/conferencing apps such as Skype, Whatsapp or Microsoft Teams can be used for private 1:1 chats and group chats without the need to create a team. Any instant messages (IMs) received by a user whilst offline will be available next time that user goes online.

Conversation history and chats remain, even after closing the application. Users must not share sensitive information within a chat unless it is intended for all invited participants. Invited participants will be able to read the chat even if they do not join the meeting, or if they have already been disconnected. Use a separate email or Teams chat for private conversations amongst a sub-group of colleagues.

To ensure we keep Personal Confidential Data (PCD) secure however, we need your assistance so that Teams is used correctly, both safely and securely. Therefore you **MUST** adhere to the following:

Minimise the use of PCD (Personal Confidential Data).

- Only send PCD via instant message where absolutely necessary, use NHSMail to NHSMail (nhs.net) in the first instance.
- If it is essential to send PCD via Teams, then it must only be sent in an encrypted and password protected attachment from an ICS device.
- However, PCD can be safely verbally disclosed during video and voice conferences, but
- PCD should NOT be openly used if the Teams meeting is being recorded

If you choose to access on personal devices then ensure the device meets the following criteria

- Device is encrypted
- Device is fully security updated (Patched)
- Device requires authentication (i.e. 6 Digit PIN, Complex Password, Fingerprint, FaceID)

Telephone Calls

Please note that it is the Practice's policy to record all telephone calls for the purposes of patient and staff care, security, and dispute resolution. Recordings and their use will comply with the Practice's Data Protection registration.

Protection against Viruses

Data is vulnerable to loss or corruption caused by viruses. Viruses may be introduced from floppy discs, CD-ROM/DVD-ROM, other storage media and by direct links via e-mail and web browsing.

Precautions to be taken

- Virus protection software is installed on ALL computer equipment.
- The supplier of our clinical software manages the anti-virus software version control and ensures it is regularly updated.
- New programmes should not be downloaded without the permission of the IT or practice manager. This reduces the risk of malware being downloaded and affecting the computer.
- When releasing any written data electronically it is best practice to see that the format is in PDF form.
- Personal Mobile phone use should be discouraged and any personal charging equipment should be subject to PAT Testing like other similar devices.
