### Background Information

The original version of GPAQ was developed at the National Primary Care Research and Development Centre (NPCRDC) in Manchester and was widely used in UK general practice as part of the QOF for the nGMS. NPCRDC has now closed and administration has moved to Cambridge University.

GPAQ has been widely used in the UK and validated over a number of years. A new beta version of GPAQ is now available to encompass Direct Enhanced Services (DES) for Patient Participation through local surveys.

A small number of questions in GPAQ are designed to be identical to the 2011/2012 version of the national GP Patient Survey which will continue to run. This will enable practices to benchmark themselves against local and national scores.

Where available, InTime Data have listed the GPPS National scores alongside the GP / Practice GPAQ score.

### Calculation of results for each question

For questions where patients have been asked to rate your services, their responses are transformed to a scale of 0 to 100 of one mark. If you are rated as "Excellent" or "Very Good" (where these are the top answers) then you will have gained 100% of 1 mark. The scaling is determined by the number of options available for each answer but always ignores answers such as "don't know" or "does not apply" etc.

Three choice questions have marks of 100, 50 and 0 percent.

Four choice questions have marks of 100, 66, 33 and 0 percent.

Five choice questions have marks of 100, 75, 50, 25, and 0 percent.

Six choice questions have marks of 100, 80, 60, 40, 20 and 0 percent.

Your score is calculated by multiplying appropriate scale rating (0 to 100) by the number of patients who awarded you that point on the scale. This figure is shown in brackets after each category. This is done for every point on the scale.

The total is calculated by adding all the subtotals and divided by the number of respondents to that question, ignoring all non-responders, including "don't know" etc. In this way your score is not affected by people who do not

Rating	Patients	Percentage	Sub-Total
Very poor	2	0	0
Poor	0	20	0
Fair	9	40	360
Good	30	60	1,800
Very good	53	80	4,240
Excellent	53	100	5,300
<b>Total</b>	<b>147</b>		<b>11,700</b>
<b>Score</b>		<b>79.59 (79.6)</b>
