National screening programmes

- The NHS provides national screening programmes so that certain diseases can be detected at an early stage.
- These screening programmes include bowel cancer, breast cancer, cervical cancer, aortic aneurysms and a diabetic eye screening service.
- The law allows us to share your contact information with Public Health England so that you can be invited to the relevant screening programme.
- More information can be found at: https://www.gov.uk/topic/population-screening-programmes or speak to the practice.

We are required by law to provide you with the following information about how we handle your information in relation to our legal obligations to share data.
