

## GP Earnings 2022/23

All GP practices are required to declare the mean earnings (e.g. average pay) for GPs Working to deliver NHS services to patients at each practice.

The average pay for GPs working in Lightwater Surgery in the last financial year was £114,571 before tax and National Insurance. This is for 5 full time GPs and 3 part time GPs who worked in the practice for more than six months.

We only employ locum doctors when it is absolutely necessary and try to provide any additional cover required ourselves. This ensures our patients can see a doctor they are familiar with, and we believe it allows the GPs to provide the best possible care to their patients.

NHS England outlines how the earnings that are published should be calculated. This calculation does not take into account how long a GP works at the surgery each week so caution must be taken when making judgments about GP earnings or when comparing with other GP practices. GP earnings at Lightwater Surgery might be split between fewer doctors than other similar sized surgeries.
