

Tips for reducing how much alcohol you drink

Have water on the table at meal times

Try a 'spacer' (non-alcoholic drink) between rounds

Pace your drinking

Start drinking later

Take smaller sips and slow down

Drink something non-alcoholic before you go out

Take up a new interest or activity

Diary

Start a drink diary, keeping track of your weekly intake

Change your drink

Take at least two days rest from alcohol a week

Drink for the taste not the quantity

Keep under a daily maximum intake

Don't drink beer and spirits together

Keep under a weekly maximum intake

If you drink spirits, dilute them

Give yourself rewards for success and money saved

Refuse drinks some rounds

Break a habit by giving up completely for a month

Horsham District Wellbeing

The best way to make change is to identify and set the goal you are working towards. If your end goal is clear then you can remain focussed and give yourself the best chance to make change.

**Make your goal SMART -
specific, measurable, achievable, realistic and time based.**

Some people like to set goals based on
units of alcohol or calories consumed.

UNITS
2.3

175ml 13%

STANDARD GLASS OF WINE

93 calories

UNITS
3.3

250ml 13%

LARGE GLASS OF WINE
