Friends and Family Test Confidential Comments: January 2015

Patient comments

Please note, the following comments are from patients who indicated that they did not wish their comments to be made public.

All comments are included in their entirety but all attempts have been made to remove details which could identify specific patients or practitioners.

Please tell us why you answered as you did in question 1:

- The care we have received here has always been good, the only downside is you cannot get through in the morning even if you call at 8.30 and then every appointment has gone.
- Very happy with all treatment received.
- Friendly atmosphere. Good doctors.
