

Community Pharmacy Consultation Service

Our surgery is participating in a new approach to improve access for our patients—by directing you to the most appropriate healthcare professional which maybe either a GP or Pharmacist. We have asked our reception staff to refer patients for a same day referral to a local Pharmacy of your choice, where you can be assessed by a Pharmacist, who is a skilled clinician and very experienced in treating minor illnesses on a daily basis.

If the Pharmacist feels you should be seen by a GP, your referral will be sent back to our surgery to be actioned by a GP.

Our aim is to improve patients access to Healthcare Services, and ensure our patients see the right medical professional's.

- Some of the Minor Illnesses a Pharmacist can assist with:**
