

IMPORTANT NOTICE TO PATIENTS- **BEWARE OF SCAMMERS**

There is heightened coverage around the recent Coronavirus outbreak around the world, which is now severely impacting on the UK and the NHS.

Unfortunately fraudsters are targeting these circumstances to take advantage of public fear and concern

We have been made aware that our patients are receiving phone calls, texts and letters from fraudsters. They will try and obtain your personal details and in particular your NHS number.

Scammers are sophisticated, opportunistic and will try many ways to get the information they want. They often target the vulnerable.

If you are suspicious, do not give any details over the phone, hang up and then ring your GP Practice to confirm
