

Privacy Notice – For staff Vaccination Information

On 9th November 2021, the Department of Health and Social Care began the process of making it a legal requirement for any staff working in health and social care settings to be fully vaccinated against COVID-19, unless exempt. This means that each staff member will be required to provide evidence that they have been fully vaccinated against COVID-19, subject to specific exemptions, by no later than 1 April 2022.

This will include front-line workers, as well as non-clinical workers not directly involved in patient care but who nevertheless may have direct, face to-face contact with patients, such as receptionists, ward clerks, porters and cleaners. These regulations will protect vulnerable people and individual workers in health and social care settings, including hospitals, GP practices, dentists, community services and where care is delivered in a person’s home.

In order to monitor compliance with the new regulations, the organisation must collect information about vaccination status of eligible staff and/or any medical exemptions that might apply.
