

Accessible Information

The Accessible Information Standard aims to ensure that patients (or their carers) who have a disability or sensory loss receive information they can access and understand, for example in large print, braille or via email, and professional communication support if they need it, for example from a British Sign Language interpreter.

This applies to patients and their carers who have information and / or communication needs relating to a disability, impairment or sensory loss. It also applies to parents and carers of patients / service users who have such information and / or communication needs, where appropriate.

Individuals most likely to be affected by the Standard include people who are blind or deaf, who have some hearing and / or visual loss, people who are deaf blind and people with a learning disability. However, this list is not exhaustive.

If you feel that this applies to you or someone in your care please complete the attached form and hand it in at the surgery or collect a form from surgery if you wish.
