

MISCARRIAGE ASSOCIATION

The knowledge to help

New leaflets for your patients – and more besides

The experience of miscarriage, ectopic pregnancy or molar pregnancy is usually very distressing. Even with the best clinical and supportive care, patients will often need further information and/or support in the days, weeks and even months ahead – and when pregnant after loss.

Our suite of 24 patient information leaflets aims to help and we're delighted to highlight three of our newest publications here, all reflecting a range of experiences, emotions and questions that people have shared with us.

You'll find our full list of leaflets and ordering information overleaf.

Further support and information
