THURSDAY 14TH SEPTEMBER 2023	TRAINING	1PM—6.30PM

Newsletter Summer 2023

Staff News

We would like to welcome our new receptionist Sarah who joined us in May.

We would like to welcome Dr M Aziz and Dr G Moray who join us as Trainee GPs in August

Long Term Condition Annual Reviews

Since April 2022 we have changed our systems so that patients with long term conditions are recalled for their annual review in their month of birth.

Don't worry if you have only recently had a review, we will still recall you so that the following year, we will bring you into line with your month of birth each year going forward.

We have found that by changing this system has made it easier for patients to remember when their annual review is due.

Summer Holidays, Vaccinations and Prescriptions

DON'T FORGET to book early for your travel vaccinations if you are going away this summer!

DON'T FORGET to request your prescriptions early to ensure you will have enough medication while on your holidays.

Facebook

Did you know you can follow the surgery on Facebook?

You can get the latest updates and information from our Facebook page.

Whooping Cough Vaccine

Are you pregnant?

Did you know you are eligible to have a Whooping Cough Vaccine between weeks 16 and 32 of your pregnancy?

[Book an appointment today with our Practice Nurse.](#)

PATCHS

Did you know that you can submit NON-Urgent medical requests for advice via PATCHS?

You can access PATCHS via the Practice Website
www.peterloomc.co.uk

Or you can also access PATCHS via the NHS App

Over 75s Digital Workshops

We are holding a series of Digital Workshops for patients aged over 75 to introduce them to digital access to the Practice, including how to use the NHS App and PATCHS. If you would like to attend please contact our Care Co-ordinator Jessica P

Research in Primary Care

Peterloo Medical Centre actively supports and participates in clinical research studies within Primary Care.

What is primary care research?

A wide range of research studies are supported which look at:

- Promoting a healthier lifestyle
- Disease diagnosis and prevention
- Management of long term illnesses such as Diabetes or Hypertension
- Prevention of future ill-health
- Treating common conditions such as tonsillitis or influenza

What are the Benefits of the GP practice taking part in research?

- It offers patients access to new treatments
- It brings new dimension to the practice and added skills to those involved
- It provides national gold standard training for research
- It offers mentorship and support to those involved in research within a practice

All clinical research carried out at Peterloo Medical Centre is thoroughly checked and approved by ethical committees thus ensuring it is appropriate and safe to perform.

Your participation is entirely voluntary and can be withdrawn by yourself at any time without explanation required.

Your care and your relationship with your doctor or nurse will not be affected in any way if you decided not to take part in a study.

How can you help and take part at Peterloo Medical Centre?

- A doctor or nurse may talk to you about a particular study and ask whether you would be interesting in participating
- You may be sent information through the post if we feel you may be a suitable participant
- You may read information about a current study in the patient waiting room or on the surgery website

Patient Online Services

[Did you know you can book appointments, request repeat prescriptions and view your medical record online?](#)

You can use the NHS App or the Patient Access website to do all of the above—please speak to our Care Co-ordinator Jessica who can assist you with your online services.
