

Your GP services are changing....

It's all about getting to see the right person in the right place at the right time.

Where it is safe, appropriate and improves your care, instead of seeing a GP (family doctor) you may see another member of our multi-disciplinary team:

- **Advanced Nurse Practitioners (ANPs)** are highly experienced senior nurses who can assess a patient, diagnosis, prescribe and treat clinical conditions. They can also refer, admit and discharge where appropriate.

- **GP Pharmacists** who can support prescribing processes, provide medication reviews and run specialised clinics.

- **Advanced Musculoskeletal (MSK) Physiotherapists** who can assess and treat pain that affects muscles, ligaments, tendons and bones.

- **Mental Health Practitioners** who will work with individuals providing assessment of possible mental illness at a practice level.

- **Community Link Workers/Connectors** who will work with patients to help them navigate and engage with wider services.

When you call your GP practice, the Practice Receptionist/Administrator may ask you some questions to find out who the right professional is to help you.
