

Practice Pharmacist - St Georges Surgery

The closing date is 31 May 2023

24 hours a week preferably over 3 days

Job summary

Are you looking for a new challenge? St Georges Surgery is looking to recruit a practice based clinical pharmacist. The aim is to release GP capacity within the surgery and to extend the pharmacist role within a primary care setting. You will be a core member of the practice team and work closely with other health care professionals.

Main duties of the job

Ideally this individual will be responsible for optimising the use of patients' medicines within the Practice, undertaking activities such as medicines reconciliation, face to face/telephone medication reviews, drug monitoring, clinical audits and dealing with medication queries.

About us

Currently we are 2 partners, and 2 long term locums covering a list size of 6,650 patients.

High achieving Practice, offering a wide range of enhanced services.

Our team includes 2 ANP's, 2 Practice Nurses who undertake long-term conditions management and minor illness services and an Independent Prescriber.

Job responsibilities

You must be a registered pharmacist with the General Pharmaceutical Council (GPhC); and you should be able to demonstrate excellent organisational and time management skills. The successful candidate will be able to prioritise workload, work independently, build key relationships and be confident interacting with a wide range of stakeholders such as GPs, Practice Nurses, secondary care clinicians and patients.

In return for your commitment, enthusiasm and professionalism, we can offer a friendly and supportive environment.
