Banbridge Group Surgery - McNiff Practice Contraceptive Pill Review

Thank you for completing this form. The aim is to ensure you are on the safest and most appropriate form of contraception for your needs. Once completed, please hand the form to reception and we will issue your next 12 month supply of the contraceptive pill within 48 hours. Scales and a blood pressure machine are available for your use in the surgery. If you are having any problems with your contraception or would like to discuss alternative methods please make an appointment.

Please see reverse	Yes / No	

Long-acting Reversible Contraception

Long-acting reversible contraceptive devices are contraceptive options that provide effective contraception for an extended period of time. This means you do not have to remember to take a daily pill, but still have reliable contraception. They can be stopped if you decide you want to become pregnant.

	Implant	Mirena Coil (IUS)	Copper Coil (IUD)	Injection
