Coronavirus (COVID-19) Pandemic

We have introduced coronavirus procedures to help protect our most vulnerable patients, and to assist us in dealing with the coronavirus pandemic. Patients are therefore asked NOT to attend the Surgery for any reason, without ringing us first.

If you require any medical advice, blood tests, or a consultation, please ring the surgery first and you will be triaged by one of our Health Care professionals. For general medical conditions all patients are advised to avoid contacting us where appropriate and instead self-care. There is a dedicated section on our website offering advice on self-care.

If you have symptoms of coronavirus or require coronavirus advice, please visit our website for the latest guidance. Our phone system will also direct you appropriately.

Prescriptions can be ordered online or by telephoning the Practice and selecting the appropriate option. All prescriptions must be collected from your chosen pharmacy only. If you do not have a pharmacy collection arrangement in place, then please advise our staff when ordering your medication online or on the telephone.
